Accomplished and innovative Full Stack Developer, Product Engineer, and **AWS Certified Developer** with 14 years of experience contributing to the architecture, design, and scaling of new and current systems. Demonstrated success in designing systems and solutions that enable business users to operate more effectively, intelligently, and efficiently. Proven track record of success leading full stack web and mobile application development using a variety of languages including **MYSQL, MSSQL, POSTGRES, MONGO, PHP, JavaScript, Python, Java, Golang, Docker, AWS, HTML, CSS, Kubernetes, Elastic Stack.** etc. Experienced in documenting new and existing functionality within software version control repositories and using DevOps and tools to deliver new features. Possesses strong leadership skills and meticulous attention to detail; effectively prioritize competing demands in high-volume environments.

Areas of Expertise Include:

- Application Development
- Project Management
- Product Design / Product Enhancement
- Sustainability
- Scaling
- Continuous Integration
- Continuous Deployment
- System Administration
- Configuration Management Tools

PROFESSIONAL EXPERIENCE

WRECKING BALL Fort Lauderdale, FL *Golang/PHP Developer - Remote* – June 2022 – Present

- Designed, developed, implemented, and tested Golang, MYSQL, Mongo, and PHP microservice applications in front facing applications for thousands of consumers on **AWS**.
- Reviewed code developed by other developers and provided feedback to ensure adherence to best practices across style guidelines, accuracy, testability, and efficiency. Developed software specifications.
- Collaborated with engineers, developers, analysts, business team members, and other stakeholders to understand business needs and functional requirements.
- Dockerize applications for faster development times
- Implemented **Elastic Stack** for better monitoring and logging.

Selected Achievements:

- Evaluated and debugged a phone number search application, ringboost.com, to make the search and checkout more reliable, while maintaining the same speed.
- Documented the same application in order for all the engineers to understand it better.
- Improve and add new features to zuora.com

TRANSFORMATIONS TREATMENT Delray Beach, FL *Full Stack Developer- Remote* – April 2019 – June 2022

- Oversee project management; manage project priorities, deadlines, and deliverables.
- Manage full stack web and mobile application development using PHP, JavaScript, CSS, HTML, etc. • Create, test, and launch websites using WordPress, Laravel, and Vue.js.
- Develop and test front-end web applications and backend APIs.
- Partner with product management and design personnel to define feature specifications.
- Collaborate with team members to address and resolve scalability issues.
- Develop and execute strategies to improve SEO and SEM for all company websites; monitor website performance to identify and correct performance gaps and ensure optimization for high traffic.

Selected Achievements:

- Developed, tested, and deployed a chatbot that uses AI to facilitate client communication.
- Consistently achieved or exceeded all productivity metrics and goals.

CONNECTION Boca Raton, FL *PHP Developer* – October 2018 – April 2019

- Designed, developed, implemented, and tested eCommerce-related web applications, content management systems, and services using Linux, Apache, MySQL, PHP, HTML, XML, CSS, and JavaScript.
- Reviewed code developed by other developers and provided feedback to ensure adherence to best practices across style guidelines, accuracy, testability, and efficiency. Developed software specifications.
- Collaborated with engineers, developers, analysts, business team members, and other stakeholders to understand business needs and functional requirements.

Selected Achievements:

- Evaluated and debugged a legacy PHP application in operation for 20+ years.
 - Added new features using JIRA for requirements management.
 - Created a test suite to test work using Dusk.
 - Identified ways to align modern behaviors with legacy functionality.
 - Evaluated and tested code using Mess Detector, Code Sniffer, and Jenkins.
 - Setup a local LAMP stack for development using Docker.

AGILE ELEMENT Fort Lauderdale, FL *Full Stack Developer* – February 2016 – October 2018

- Led the design and development of new systems, including front-end and back-end applications; developed, tested, and deployed applications using Laravel, Vue JS, MySQL, NGINX, Apache, etc. Built applications for legacy and modern services using FuelPHP. Installed WordPress plugins for Google Maps and Pharmaquotes.com.
- Created single page applications, shopping cart SPAs, scrum boards, and libraries using Vue, Vuex, Vue Router, and Vue Native. Created and maintained reusable Vue components and corresponding documentation.
- Create database architecture for new applications using MySQL. Parsed CSV data to generate reports. • Maintained production servers. Setup testing environment and CRON jobs on Linux.
- Setup and maintained APIs across Google, Amazon, Twilio, Social Media Platforms, Stripe, Authorize.net, etc.

Selected Achievements:

- Developed, tested, and deployed a text messaging microservice using Laravel, MySQL, and Twilio. • Set-up continuous integration and continuous deployment (CI/CD) for the quality assurance (QA) environment.

WHITE SANDS TREATMENT CENTER Lauderdale by the Sea, FL

PHP Developer / Team Leader – October 2014 – February 2016
